

## ChatGPT Prompt Genius

<https://www.reddit.com/r/ChatGPTPromptGenius/>

*Did you know that ChatGPT has secret codes?*

### Academic Writing

You can use these simple prompt “codes” every day to save time and get better results. Here are my 5 favorites:

#### 1. ELI5 (Explain Like I’m 5)

Let AI explain anything you don’t understand — fast, and without complicated prompts. Just type **ELIS:** [your topic] and get a simple, clear explanation.

#### 2. TL;DR (Summarize Long Text)

Want a quick summary?  
Just write **TLDR:** and paste in any long text you want condensed. It’s that easy.

#### 3. Jargonize (Professional/Nerdy Tone)

Make your writing sound smart and professional.  
Perfect for LinkedIn posts, pitch decks, whitepapers, and emails.  
Just add **Jargonize:** before your text.

#### 4. Humanize (Sound More Natural)

Struggling to make AI sound human?  
No need for extra tools — just type **Humanize:** before your prompt and get natural conversational responses.,  
Bonus: No more cringe words like “revolutionary,” “game-changing,” or “introducing.”

#### 5. Feynman Technique (Deep Understanding)

Go beyond basics and really understand complex topics.  
This 4-step technique breaks things down so you actually get it:

- ❖ Teach it to a child (ELI5)
- ❖ Identify knowledge gaps
- ❖ Simplify and clarify
- ❖ Review and repeat

### Pro tip:

All it takes is adding 1-2 words to your prompt for amazing results. Try these out and watch your productivity soar!
